RE: Proposal for Engineering Services, Berkman Platform Repairs 16707-25

Dear Mr. Goldsberry,

HDR appreciates your consideration in requesting our support for the above-mentioned project. Please find herein our proposal for providing Phase 1 of the requested services.

Project Understanding

The City of Jacksonville (City) has requested HDR's support in providing Professional Structural Engineering services for the site survey, design, acquisition of all required permits, plans and specifications for structural repairs to the Berkman deck under the Berkman Park, Berkman Townhomes, and parking garage including bidding assistance. This concrete deck and steel pipe and H pile supported structure is located south of the Berkman Tower beyond the bulkhead along the Northbank Riverwalk on the St. Johns River. The design will be based on a feasibility study prepared by RS&H and data developed during the investigation phase. Professional Services During Construction (PSDC) are not included in this phase and will be negotiated later.

All design recommendations shall, as may be applicable, be consistent with:

- The City's Land Development Procedures Manual.
- FDOT Minimum Standards for Design, Construction and Maintenance of Streets and Highways
- FDOT Structures Manual (Current Edition) and appropriate Structures Design Bulletins
- FDOT Soils and Foundations Handbook (Current Edition)
- FDOT Design Standard Index
- ionJEA Design Standards and JEA Water & Sewer Standards Manual

The City has identified the construction limits for this project and has provided the following guidance as a basis for this proposal:

- Design of structural rehabilitative elements
- Establish a monitoring plan to identify any movement in the platform which might indicate structural failure.
- PE diver exploration and advanced surveying techniques necessary to confirm condition and location of existing structural components and provide updated assessment of condition and capacity, to verify existing structure drainage or utility penetrations, to observe existing defects that need be addressed prior to driving potential new piling, and to scan the underdeck area for debris or other impediments to construction.
- Permitting will be performed by HDR. HDR's 30% submittal drawings will be used for coordination with regulatory agencies and for development of permit application packages.
- Subsurface Utility Engineering to identify utilities that are within the limits of construction and may need to be repaired, relocated and/or removed.

It is anticipated that, in general, construction could include the following:

- Repairing the existing bulkhead and tie-backs.

hdrinc.com

76 S. Laura Street Suite 1600 Jacksonville, FL 32202
T 904-598-8900

- Modifications of existing drainage outfalls and connections to existing utility services that are to remain.
- Installation of sacrificial cathodic protection
- Construction of temporary access points to allow access to existing structures
- Removal of existing failed structural items
- Construction of pile jackets and structural repairs
- Incidental dredging required to enable construction

Minor environmental impacts are expected and will be addressed with the appropriate permitting agencies.

Project Scope

Exhibit A provides detailed manhour and expense budget breakdown and delineates individual responsibilities for the delivery of the project.

PROJECT MANAGEMENT (ALL ACTIVITIES)

HDR will provide project management for all activated task items for which it is involved over the life of the project. This work will involve general project management duties such as subconsultant field services coordination (as applicable); implementation of project controls and management reviews; maintenance and recording of key project communiqués, design assumptions, decisions, and data; status reporting and invoicing; scheduling of manpower and project deliverables; and Quality Assurance / Quality Control based on HDR's pre-established QC program.

ACTIVITY 1 – PROJECT DEFINITION AND CONCEPT VETTING; FIELD STUDIES

- **Document Data Review**: Where such documents are available, HDR will review City provided as-built or construction documents; facility inspection reports; site studies; existing topographic and hydrographic surveys; field testing reports; and existing permits and supporting data to gain an understanding of existing site conditions and constraints and to determine whether additional studies and testing will be required. *Deliverable:* No formal deliverable.

- **Field Studies and Investigations**: Based on review of available data and studies provided by the City, and Document Data Review, HDR will initiate topographic, hydrographic, side scan sonar, ecological, and geotechnical studies necessary to support the project. *Deliverable:* HDR will provide data and recommendations for use in designing and/or contracting the work.

- **Condition Assessment** HDR will assess a representative portion of the structure *(as depicted in Exhibit A, approximately 585 piles)* and condition of the platform to gain insight with regards to the existing structure capacity for the purpose of evaluating safe working loads and restrictions during construction. HDR will provide recommendations on required construction scope and will collaborate with the City to develop methods for rehabilitation/demolition. A monitoring plan will be developed and executed for the duration of this phase.

- **Concept Vetting** HDR will perform the following due diligence activities in establishing the preferred viable concept for further advancement:

- Consider the capability of differing structure support types and issues and the means for constructing suitable rehabilitation, and collaborate with the City to select preferred solution.

ACTIVITY 2 – ENVIRONMENTAL PERMITS & AGENCY COORDINATION

- State Environmental Resource Permitting, Chapter 62-330, F.A.C. - prepare initial documentation and graphics required for submittal of a permit application to FDEP.
- Federal Clean Water Act Section 404 Permitting – Includes preparing initial documentation and graphics required for submittal of a federal Clean Water Act Section 404 permit application. This location is considered to be in U.S. Army Corps of Engineers (USACE) jurisdictional water; therefore, USACE will issue the permit associated with this project.

ACTIVITY 3 – DETAILED DESIGN TO NOMINAL 30%

- **Basis of Design (BOD):** HDR will develop and provide for City's project records a preliminary project BOD. This will briefly document appropriate design assumptions, decisions, and compliance requirements that form the basis for development of the contract documents. This will also document loading criteria, reference the design codes to be utilized in the design, and provide an outline of pertinent methodology of design, as deemed appropriate by HDR. Specification of construction material requirements, when a necessary component of the design, will also be included. Key data will include, though not be limited to, as-built information, pile and platform inspection data and recommendations, site topographic and hydrographic surveys, and decision communications; said information will be included as appendices or by reference. *Deliverable:* An initial Draft document will be developed for City's review and comments. This will include a preliminary Opinion of Probable Construction Cost.

Project Schedule

The proposed tasks in this Phase 1 proposal are expected to be completed within 12 months after NTP.

Project Fees

Exhibit A of this proposal provides a detailed breakdown of manhours and basis of recommended budget.

HDR is recommending a total Lump Sum Task Budget of **$1,800,952.04.**

Permit application fees are not included in this amount.

City's responsibilities

- Provide public communications and coordinate with private owners of their respective sections of the platform regarding cost, schedule and construction.
- Execute a blanket easement with all owners to allow access for HDR and its subconsultants to investigate and inspect the platform during design and construction.
- Assist HDR with coordination with utilities impacted by design and construction and new structure requirements necessary for accommodating desired utilities. A separate scope and fee will be prepared for design and construction of JEA facilities.

- Provide locations and requirements for contractor access, staging, laydown, office, etc.
- It is assumed that the City will provide internal coordination amongst its member stakeholders and internal service providers and that direction will be given from a single assigned Point of Contact (POC) as representative of all stakeholders' consensus. Similarly, HDR will direct all communications to single POC with the understanding that they will be forwarded to appropriate staff and Consultants for review, comment, or action, as appropriate. When review comments are to be provided for HDR deliverables, the POC will consolidate and provide in single document format.

Key Assumptions and Qualifications

1. HDR is unaware of any significant existing drainage outfalls, previously injected structural concrete or grout void repairs, or other special structures or conditions which, if encountered, could result in material changes to the design concept or that would require additional designs. As a limiting basis for the proposed budget, HDR is assuming that no special structural designs will be required in relation to the presence of these potential conflicts (for example, providing temporary or permanent bypass for an existing drainage culvert, construction of major municipal plant or facility outfall extension and / or headwalls and related scour protection, construction of temporary cofferdams or dewatering, etc.). Should such special designs be determined necessary during execution of the work, HDR can provide necessary designs as a negotiated supplement to the Task Order or as a separate negotiated Task Order if they cannot be accommodated within the existing budget.
2. HDR's design will accommodate known existing structural and utility conflicts based on the information provided by the City and the results of proposed field studies and investigations. This scope does not provide for additional subsurface investigations or for multibeam, side scan, or diver surveys below the existing river bottom for the purpose of locating unknown debris, structure, or utilities.
3. It is assumed that any utility or security related infrastructure (fiber, cameras, lighting, potable water, sanitary sewer, etc.) is not included in the scope of services beyond provision of platform conduit, dockside pits, mounting brackets, or similar, of size and location to be defined by City.
4. It is assumed that the following permits will be required:
   - Florida Department of Environmental Protection (FDEP)
   - U.S. Army Corps of Engineers (USACE)
   - City of Jacksonville
   - JEA
5. It is assumed that environmental clearances will be required from the following agencies:
   - U.S. Fish and Wildlife Service (USFWS)
   - National Marine Fisheries Service (NMFS) – Protected Resources Division (PRD) and Habitat Conservation Division (HCD)
   - Florida Fish and Wildlife Conservation Commission (FWC)
   - State Historic Preservation Officer (SHPO)
6. No additional stormwater facilities will be required.

7. All interim and final deliverables will be provided in electronic (PDF, Word, or AutoCAD) format, except where hard copy is specifically required for formal agency submittal and processing.
8. Completion of the Task(s) is partly dependent on input provided by the City. HDR will endeavor to complete all work in the timeline presented herein, subject to timely receipt of key project data, draft deliverable review comments, etc., from the City as required. HDR will provide critical path delivery dates for such materials, as is applicable, as the work is performed. City agrees to provide equitable adjustments to project schedule should HDR be delayed by circumstances outside of its control.
9. The manhours indicated in Exhibit B provide the basis for the level of effort anticipated for this Task Order. Within the limits of the proposed budget, HDR will adaptively allocate resources amongst Tasks and Activities to best support advancement of the project. Should it become evident that actual effort for any Task or Activity will significantly diverge from the assumptions set forth in the manhour breakdown, HDR will notify the City for concurrence or further direction.

Work not Included in HDR's Proposed Scope of Services

It is HDR's desire to support the City in delivering the project successfully. HDR will strive to accommodate this delivery within the limits of the proposed Task Order budget and timeline; however, it is possible that there could be additional activities, which will be defined as the project evolves, that may be required to advance the project and which are not provided for in the current scope of services. Though not intended as a comprehensive list, HDR has identified several potential tasks or project risks that are not addressed in the proposed project scope, but that could be provided for as a modification to the Task Order, or as a separate Task.

1. The scope does not provide for dynamic passing vessel studies, static mooring analysis, or breasting studies.
2. The scope does not provide for identification of need, design, specification, or preparation of contract documents for utilities, MEP, or lighting. A separate contract will be executed with JEA for design of affected water, sewer and electric facilities.
3. Based on prior direction given by the City, the scope does not provide for stormwater management planning or for stormwater collection, storage, or treatment design.
4. HDR understands that, currently, the City does not expect Federal funding for the project; thus, performance of NEPA or FEMA documentation is not included in the scope of services. Should Federal participation later be sought, that could trigger the need for more comprehensive studies and documentation.
5. Development of onsite stormwater treatment or off-site compensatory stormwater treatment has not been included in the scope of services. Should this later become a necessity, HDR can perform these services as a separate Task or as a Task modification amendment.
6. Other work, assumed not necessary as a basis of the proposal, as is described in "Project Understanding" or in "Key Assumptions and Qualifications", above.

Conclusion

We greatly appreciate the City's consideration in requesting HDR's support and look forward to helping the City successfully advance this project. We hope that the proposed scope

RE: COJ Berkman Platform Engineering Design Survey

Mr. McGregor,

As requested, George F. Young, Inc. (GFY) is providing a proposal for an engineering design survey of Berkman Platform, located in Jacksonville, FL. The purpose of the survey is to provide surveying services including a property boundary survey, a topographic survey of the above deck conditions, a Subsurface Utility Engineering (SUE) survey, a bathymetric survey of the existing river bottom under and adjacent to the Platform deck and a laser scan survey of the underdeck structure. The project will be managed by a Licensed Professional Surveyor & Mapper (PSM) and an NSPS Certified Hydrographer II (CH).

1. **<u>Survey Task:</u>**

    a. **Project Setup and Control**: Verification and/or establishment of survey site control for property boundary, topographic, hydrographic, and scanning acquisition support. Tasks to include:
    - Review existing survey records
    - Obtain benchmark information
    - Establish horizontal and vertical control with conventional, static GNSS observations or RTK network tie
    - Set Permanent Site Control – (6)
    - Establish Underdeck control for bathymetry and LiDAR survey

- Perform control verification with coordinates and elevations

    - **Positional Tolerances and Expected Accuracies:** Primary control points shall achieve H95 ≤ 0.05 ft and V95 ≤ 0.05 ft. Topographic mapping shall meet H95 ≤ 0.10 ft and V95 ≤ 0.05 ft on hard surfaces (V95 ≤ 0.10 ft on unimproved terrain), verified by independent checkpoints. Above-deck NavVis LiDAR shall meet absolute accuracy H95 ≤ 0.10 ft and V95 ≤ 0.10 ft with target residuals ≤ 0.05 ft (H) and ≤ 0.03 ft (V).

b. **Site Property Boundary Survey:** Prepare a boundary survey in accordance with Florida Administrative Code 5J-17.052 (Standards of Practice – Boundary Survey Requirements) at the lands generally adjacent to S. Liberty Street and the St. Johns River. Tasks to include:

- Locate visible boundary monuments
- Identify occupation evidence
- Research plats, deeds and existing boundary data available and information provided by client.
- Identify and map the alignment and R/W of S. Liberty Street adjacent to site.

c. **Topographic Survey Component:** Perform detailed measurement and mapping of natural and man-made features within the limits of survey to define horizontal and vertical positions for engineering design. An additional buffer will be included around the deck to include features within the existing docking basin. Task to include the use of conventional and RTK survey procedures and NavVis VLX LiDAR scanning. The system utilizes dual LiDAR sensors integrated with inertial measurement and SLAM-based processing to rapidly acquire high-density three-dimensional point cloud data and panoramic imagery. The technology enables efficient capture of complex spaces while maintaining spatial consistency through loop closure optimization. Survey control will be incorporated as required to achieve project-specific horizontal and vertical accuracy standards and will consist of control targets placed throughout the scan area and independent ground check points.
Task to include:

- Ground surface data acquisition
- Planimetric feature location and mapping
- Surface visible utility location and mapping
- NavVis LiDAR scan of site for geo-referenced 3D point cloud generation

d. **Subsurface Utility Engineering (SUE) Services:** ASCE Quality Level "B" Designation – GFY to utilize conventional electronic designating equipment including ground-penetrating radar (GPR), to designate, mark and verify with paint and/or flags the horizontal location of found underground utilities within the project limits.

- GFY to locate and map found utility information and incorporate into final survey submittal.

- GFY to provide traffic control within the work areas while designating and locating the subsurface utilities. Traffic control is to be maintained in accordance with applicable standards. Provide safety devices, signs and/or other safety equipment as appropriate.
- Exclusions: The following items are specifically excluded from the above SUE scope of services.
  1. Any work associated with vertical location of underground utilities.
  2. Any work associated with designation of gravity sanitary, gravity storm, irrigation, lighting, or any other water/reclaim/sanitary service lines 2" inches or less in diameter.

e. **Underdeck Bathymetric Component:** GFY will acquire single-beam bathymetry (200kHz) beneath the concrete platform deck to support engineering evaluation of bottom configuration, localized depressions/scour indicators, sediment accumulation, and grade transitions. All depths will be reduced to NAVD88 and tied to the project horizontal and vertical datums.

- **Positioning Methodology:** Hydrographic acquisition beneath the deck will be performed using a low-profile, electric-powered, remotely operated micro-unmanned surface vessel (micro-USV) configured for confined and low-clearance environments. Observed water surface elevations will be recorded during all survey acquisition and applied during post-processing. Because GNSS reception beneath the deck is obstructed, positioning will be derived from:
  1. Onboard inertial and dead-reckoning navigation between control updates.
  2. Periodic visual-alignment resets to previously surveyed underdeck pile nodes and control features.
  3. Visual resets will be performed by station-keeping the USV at or adjacent to known control locations and time-tagging reset events for post-processing adjustment.

- **Operational Constraint:** Bathymetric data acquisition beneath the deck is tide-dependent and will be performed only during low-tide cycles to maintain safe clearance for the remote survey platform and to operate within the constrained pile grid. Field operations will be scheduled around predicted low tides and verified by onsite water level observations. The number of mobilizations and total field duration may vary based on tide-window duration, currents, weather conditions, and site access constraints.

f. **Underdeck Structural LiDAR:** Concurrent with hydrographic acquisition, a SLAM-based LiDAR system mounted to the micro-USV will capture under-deck structural geometry (soffit, beams, girders, pile caps). Underdeck SLAM deliverables are

intended for geometry documentation and clearance evaluation; they are not intended for high-precision deformation monitoring.

- Scanning paths will include overlapping passes to strengthen SLAM loop closure and minimize drift. The resulting point cloud will be processed and optimized to produce a clean, engineering-grade 3D model.
- Field acquisition will occur exclusively during low-tide cycles to maintain safe clearance. Multiple tide windows will be required to achieve full coverage.

g. **Underdeck Positioning and Accuracy Statement:** Underdeck hydrographic and structural LiDAR acquisition will be supported by a dead-reckoning USV navigation solution with periodic visual-alignment resets to surveyed underdeck pile nodes/control features. Visual resets shall occur at intervals not exceeding 75 ft of travel or 2 minutes, and at all bay transitions. Visual reset horizontal uncertainty is anticipated to be ≤0.50 ft (95%). Post-processed USV trajectory shall achieve H95 ≤0.40 ft. Underdeck single-beam bathymetry reduced to NAVD88 shall meet TVU95 ≤0.20 ft with sounding horizontal accuracy H95 ≤0.50 ft, verified by increased crossline density. Underdeck USV-mounted SLAM LiDAR shall meet H95 ≤0.50 ft and V95 ≤0.15 ft with documented constraint residuals and independent checkpoint verification.

h. **Structural Monitoring Surveys:** Provide recurring monthly three-dimensional documentation of the above-deck structural and surface conditions using a NavVis SLAM-based mobile LiDAR system. The purpose of the program is to:

- Document structural and surface geometry
- Monitoring comparisons are intended for change visualization and condition assessment. Quantified deformation reporting beyond stated LiDAR accuracy tolerances is not implied.
- Provide current 3D data for engineering review
- Maintain an up-to-date digital record of site conditions
- Each monthly survey will be spatially registered with a consistent control framework to allow direct comparison between survey epochs.
- A point cloud-to-point cloud comparison methodology will provide after each survey.

2. **Project Datum:** The Horizontal project datum will be based on the East Zone of Florida and referenced to the North American Datum of 1983 NAD83(2011). The Vertical project datum will be referenced to the North American Vertical Datum adjustment of 1988 (NAVD88). Reference will be made to local tidal datum offsets to NAVD88 datum. The units of measurement will be U.S. Survey Foot.

3. **Schedule:** Anticipate work to begin within 30 days of NTP and final deliverables to be provided 90-120 days after written Notice to Proceed.

4. **Deliverables:** Data will be presented on digital and compatible electronic files provided to clients that illustrate the current existing conditions measured at the time of survey.
    a. GFY shall provide an electronic version of the survey in AutoCAD Civil3D "DWG" format and "PDF" transmitted by electronic means.
    b. 3D point cloud in LAS format and/or XYZ ASCII format.
    c. Professional Surveyors Report.

Accuracy of Work; Liability for Errors and Omissions

1. The CONSULTANT shall be responsible for the accuracy of its work, including work by any subcontractors, and shall promptly make necessary revisions or corrections resulting from errors and omissions on the part of the CONSULTANT or subcontractors without additional compensation. Acceptance of the work by the CITY shall not relieve the CONSULTANT of the responsibility for subsequent corrections of any such errors and the clarification of any ambiguities.

2. At any time during the construction of the Project provided for by the Contract Documents or during any phase of work performed by others based on data furnished by the CONSULTANT under this Agreement, the CONSULTANT shall confer with the CITY for the purpose of interpreting the information furnished and/or to correct any errors and/or omissions made by the CONSULTANT. The CONSULTANT shall prepare all drawings or data to correct its errors and/or omissions without added compensation, even though final payment may have already been received therefor.

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

3. The CONSULTANT shall be and shall remain liable, in accordance with applicable law, for all damages to the CITY caused by the CONSULTANT's breach of contract or its negligent performance of any of the services furnished under this Agreement. The CONSULTANT shall not be responsible for (i) any time delays in the Project caused by circumstances beyond the CONSULTANT's control, or (ii) any additional construction costs, other than the "Recoverable Damages" defined below, that would have been incurred by the CITY if the Contract Documents had been properly prepared in the first place. However, the CONSULTANT will be liable to the CITY for the following damages associated with such breach of contract or negligent performance ("Recoverable Damages"): any retrofit expenses (such as the cost to remove installed work), intervening increases in the cost of the labor, supplies or building components, and any other avoidable costs resulting from the breach or negligent performance that are not otherwise recoverable under this Agreement; and liquidated damages equal to 20% of the cost of any Change Order issued to the CONTRACTOR to perform the work necessary to correct the breach or negligent performance. This payment shall not constitute a penalty, but rather is the parties' reasonable estimate of the amount necessary to compensate the CITY for (i) increased administrative/oversight costs of CITY staff, (ii) recovery of the "builder's premium" for Change Orders that the CITY cannot competitively bid out, and (iii) the damages resulting from the fact that CITY will need to pull funding from other CITY-budgeted projects to cover the costs of the Change Order; and any other damages available to the CITY at law or in equity.

Acceptance of the Services by City shall not relieve Contractor of these responsibilities. The warranties and covenants in this paragraph will extend to all subcontractors as well.

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

The foregoing warranties and covenants shall not apply (i) with respect to any portions of the Service that have been produced by anyone other than Contractor or its subcontractors; (ii) to any modifications made by anyone other than Contractor or its subcontractors or without Contractor's specific prior written consent; or (iii) to any use of the Service in a manner or for any purpose other than those contemplated in the Contract. EXCEPT AS EXPRESSLY STATED IN THE CONTRACT, THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES REGARDING MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. CONTRACTOR'S WARRANTIES EXTEND SOLELY TO CITY.

17. City Will Assist Contractor. At Contractor's request, City will provide reasonable assistance and cooperation to Contractor, including the supply of any data and information necessary for Contractor to provide the Services. City will also designate a Contract Manager who will, on behalf of City, work with Contractor and administer the Contract in accordance with its terms.

18. Location Requirements for Services. Unless otherwise stated in the RFQ or the Response, the majority of the Services shall be performed within Duval County, Florida and no Services will be performed outside of the United States. These restrictions may be modified in writing if City determines, in its sole discretion, that the restrictions impose an undue burden on Contractor's ability to perform the Services as contemplated in the Contract.

-

19. Use of Subcontractors; Flow-Down Provisions. Except to the extent the use of subcontractors is disclosed in the Response or consented to in writing by City, Contractor shall not be allowed to subcontract or assign any of its duties and obligations hereunder. In all cases, Contractor will be responsible for the acts or omissions of its subcontractors. Contractor will ensure that all relevant contractual obligations will flow down to the subcontractors and will be incorporated into the subcontracts (including the obligations relating to insurance, indemnification, delays, intellectual property rights, public records, non-discrimination, audits, security, location of services, termination, transition assistance, warranties, and the manner in which the Services are to be performed).

20. Meetings and Reports. Contractor must attend all meetings and public hearings relative to the Services where its presence is determined to be necessary and requested by City and Contractor can reasonably schedule its appearance. Unless otherwise agreed, Contractor shall provide a monthly report summarizing Contractor's performance. Contractor shall provide other periodic reports respecting the Services as City reasonably requests.

21. Ownership of Works.

(a) The term "Work" shall mean each deliverable, drawing, design, specification, rendering, notebook, tracing, photograph, reference book, equipment, expendable equipment and material, negative report finding, recommendation, data and memorandum of every description, shared with or delivered to City pursuant to the Contract.

(b) With the exception of Contractor's pre-existing intellectual capital and third-party intellectual capital as described

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

in Section below, City shall own all right, title and interest, including ownership of copyright (limited to the extent permitted by the terms of any governing licenses), in and to each Work including, but not limited to, software, source code, reports, deliverable, or work product developed by Contractor specifically for City in connection with the Contract, and derivative works relating to the foregoing. The use of these Works in any manner by City shall not support any claim by Contractor for additional compensation.

(c) Each Work, and any portion thereof, shall be a "work made for hire" for City pursuant to federal copyright laws. Any software, report, deliverable, or work product as used in connection with the Work, but previously developed by Contractor specifically for other customers of Contractor or for the purpose of providing substantially similar services to other Contractor customers, generally shall not be considered "work made for hire", so long as the foregoing are not first conceived or reduced to practice as part of the Work. To the extent any of the Works are not deemed works made for hire by operation of law, Contractor hereby irrevocably assigns, transfers, and conveys to City, or its designee, without further consideration all of its right, title and interest in such Work, including all rights of patent, copyright, trade secret, trademark or other proprietary rights in such materials. Except as provided in the foregoing sentences, Contractor acknowledges that City shall have the right to obtain and hold in its own name any intellectual property right in and to the Work. Contractor agrees to execute any documents or take any other actions as may reasonably be necessary, or as City may reasonably request, to perfect or evidence City's ownership of the Work.

22. <u>Intellectual Property</u>.

(a) Contractor grants to City an irrevocable, perpetual, royalty free and fully paid-up right to use (and such right includes, without limitation, a right to copy, modify and create derivative works from the subject matter of the grant and the right to sublicense all, or any portion of, the foregoing rights to an affiliate or a third party who provides service to City. Contractor's intellectual property (including, without limitation, all trade secrets, patents, copyright and know-how) that is contained or embedded in, required for the use of, that was used in the production of or is required for the reproduction, modification, maintenance, servicing, improvement or continued operation of any applicable unit of Work.

(b) If the Work contains, has embedded in, or requires for the use of, any third party intellectual property, or if the third party intellectual property is required for the reproduction, modification, maintenance, servicing, improvement or continued operation of the Work, Contractor shall secure for City an irrevocable, perpetual, royalty free and fully paid-up right to use all third party intellectual property. Contractor shall secure such right at its expense and prior to incorporating any third party intellectual property (including, without limitation, all trade secrets, patents, copyright and know-how) into any Work, including, without limitation, all drawings or data provided under the Contract, and such right must include, without limitation, a right to copy, modify and create derivative works from the subject matter of the grant of the right and a right to sublicense all or any portion of the foregoing rights to an affiliate or a third party service provider. This subparagraph does not apply to standard office software (e.g., Microsoft Office).

(c) Should City, or any third party obtaining such Work through City, use the Work or any part

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

thereof for any purpose other than that which is specified in the Contract, it shall be at City's and such third party's sole risk.

23. Software Development Processes and Standards. To the extent any software is developed, modified, or otherwise procured under the Contract, Contractor will use commercially-accepted software development and documentation processes and standards.

24. Limitation of Warranty for City-Furnished Software. In lieu of any other warranty expressed or implied herein, City warrants that any programming aids and software packages supplied for Contractor use as City-furnished property shall be suitable for their intended use on the system(s) for which designed. In the case of programming aids and software packages acquired by City from a commercial source, such warranty is limited to that set forth in the contractual document covering the product(s). Should City furnish Contractor with any programming aids or software packages that are found not to be suitable for their intended use on the system(s) for which designed, Contractor shall notify City and supply documentation regarding any defects and their effect on progress on the Contract. City will consider equitably adjusting the delivery performance dates or compensation, or both, and any other contractual provision affected by the City-furnished property in accordance with the procedures provided for in Section 3.3 above ("City's Right to Make Changes").

25. Loss of Data. If any City data or record is lost or corrupted due to the negligence of Contractor or any of its subcontractors or agents, Contractor shall be responsible for correcting and recreating all production, test, acceptance and training files or databases affected which are used in the provision of services, at no additional cost to the City in the manner and on the schedule set by City. This remedy shall be in addition to any other remedy City may be entitled to by law or the Contract.

26. Purchase Orders. If the Contract requires a Service to be ordered by City via purchase order, Contractor shall not deliver or furnish the Service until a City transmits a purchase order. All purchase orders shall bear the Contract or solicitation number, shall be placed by City directly with Contractor, and shall be deemed to incorporate by reference the Contract. Any discrepancy between the Contract terms and the terms stated on the Contractor's order form, confirmation, or acknowledgement shall be resolved in favor of terms most favorable to City.

27. Best Pricing for Comparable Services to Other Government Entities. Compensation for the Services shall be as set forth in the Contract. During the Contract term, if Contractor offers better pricing to other government entities for substantially the same or a smaller quantity of Services upon the same or similar terms of the Contract ("Better Pricing"), then the price under the Contract shall be immediately reduced to the better price. City may require Contractor to certify on an annual basis that Better Pricing (as defined above) does not exist.

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

28. Invoicing and Payment.

(a) Unless otherwise specified in the RFQ, payment to Contractor for Services shall be made on a monthly basis for the Services provided by Contractor for the preceding month. Invoices shall contain the Contract number, purchase order number if applicable, and the appropriate vendor identification number. City may require any other information from Contractor that City deems necessary to verify its obligation to pay under the Contract. Payments will be made to Contractor approximately thirty (30) days after receipt and acceptance of a proper invoice. City does not pay service charges, interest or late fees unless required by law.

(b) To the extent Contractor's fees include reimbursement for travel or travel- related expenses, such travel and travel-related expenses shall be subject to and governed by the provisions and limitations of Chapter 106, Part 7, Jacksonville Ordinance Code.

(c) City's obligations to make payment are contingent upon availability of lawfully appropriated funds for the Services.

29. Taxes. City is generally exempt from any taxes imposed by the State of Florida or the Federal Government. Exemption certificates will be provided upon request. Contractor shall not include any state, local and federal taxes in any prices quoted to City.

30. Right of Setoff. City may, in addition to other remedies available at law or equity and upon notice to Contractor, retain such monies from amounts due Contractor as may be necessary to satisfy any claim for damages, penalties, costs and the like asserted in good faith by City (or any other local government entity or authority located in Duval County, Florida) against Contractor.

31. Retention of Records / Audits.

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

(a) Contractor must establish and maintain books, records, contracts, sub-contracts, papers, financial records, supporting documents, statistical records and all other documents pertaining to the Contract (collectively, the "Records"), in whatsoever form or format (including electronic storage media) is reasonable, safe and sufficient.

(b) Contractor must retain all Records for a minimum period of three (3) years after the final payment is made under the Contract. If an audit has been initiated and audit findings have not been resolved at the end of the three (3) year period, the Records shall be retained until resolution of the audit findings or any litigation which may be based on the terms of the Contract, at no additional cost to City. Records shall be retained for longer periods when the retention period exceeds the time frames required by law or ordinance.

(c) At all reasonable times for as long as the Records are maintained, Contractor must allow persons duly authorized by City (including City's auditor and inspector general offices), and to have full access to and the right to examine, copy or audit any of the Records, regardless of the form in which kept. Contractor will not charge City for any setup, supervision or space in connection with the examination and audit. Photocopying charges will not exceed the actual and reasonable cost of the copies to Contractor, and City shall be permitted to bring its photocopying equipment if City so desires.

(d) Contractor must comply with and cooperate in any audits or reports requested by City and must ensure that all related party transactions are disclosed to the auditor.

(e) Contractor must permit City to interview any of Contractor's employees, subcontractors and subcontractor employees to assure City of the satisfactory performance of the terms and conditions of the Contract. Unless the parties agree otherwise or City is willing to pay for the employee's reasonable travel expenses, the interviews will be conducted at the employee's primary place of work. Contractor will not charge City for any employee time unless the interview time for that employee exceeds eight (8) hours in a calendar year.

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

(f) Following any audit or review, if performance of Contractor is, in the opinion of City, deficient, City will deliver to Contractor a written report of the deficiencies and request for development by Contractor of a corrective action plan. Contractor hereby agrees to prepare and submit, to City, said corrective plan within ten (10) days of receiving City's written report. Thereafter, Contractor must correct all deficiencies in the corrective action plan within a reasonable time after City's receipt of the corrective action plan.

(g) All reports and other information provided by Contractor pursuant to this Section shall be submitted under penalties of perjury, under Section 837.06, Florida Statutes.

(h) Contractor must include the aforementioned audit, inspection, investigation and record-keeping requirements in all subcontracts and Contract assignments.

(i) Contractor agrees to reimburse City for the reasonable costs of investigation incurred by City for audits, inspections and investigations that uncover a material violation of the Contract. Such costs shall include the salaries of investigators, including overtime, travel and lodging expenses, and expert witness and documentary fees. Contractor shall not be responsible for any costs of investigations that do not uncover a material violation of the Contract.

32. City's Right to Suspend Work. City may in its sole discretion suspend any or all activities under the Contract by providing a written notice to Contractor at least five (5) days in advance that outlines the particulars of suspension. Within ninety (90) days of providing such notice, or within any longer period agreed to by Contractor, City shall either (1) authorize the resumption of work, at which time activity shall resume, or (2) terminate the Contract in accordance with the applicable termination provisions. Suspension of work shall not entitle Contractor to any additional compensation.The parties will reasonably amend any schedules relating to performance of the Services to reflect the suspension of work hereunder. Contractor shall not be entitled to receive compensation for any work it performs after being excused from providing it hereunder.

33. City's Right to Terminate for Convenience. City reserves the right to terminate the Contract at any time and for any reason by giving written notice to Contractor. If the Contract is terminated for convenience as provided herein, City will be relieved of all further obligations other than payment for that amount of Services actually performed to the date of termination. Access to any and all work papers will be provided to the District after the termination of the Contract. The parties understand and agree that Contractor shall not have a reciprocal right to

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

terminate the Contract for convenience; it being understood that City's payment for Services forms the consideration for Contractor not having this right. In the event of City's termination of the Contract, City (in its sole discretion) may also require Contractor to provide the Transition Services as set forth in Section 3.26 below.

34. City's Remedies Upon Contractor Default. Any one or more of the following events, if not cured within ten (10) calendar days after Contractor's receipt of written notice thereof, shall constitute an "Event of Default" on the part of Contractor: (1) Contractor fails to perform the Services within the time specified in the Contract or any extension, (2) Contractor fails to maintain adequate progress, thus endangering performance of the Contract, (3) Contractor fails to honor any other material term of the Contract, or (4) Contractor fails to abide by any statutory, regulatory, or licensing requirement. City may extend the 10-day cure period in its discretion.

In addition, the following shall constitute an immediate Event of Default with no right cure: (i) Contractor is found to have made a false representation or certification in its Response, or (ii) Contractor has been placed on the list maintained under Section 287.135, Florida Statutes, of companies with activities in Sudan or in Iran Petroleum Energy Sector.

Upon an "Event of Default" on the part of Contractor, City will be entitled to terminate the Contract and pursue such other remedies available at law or equity, including the recovery of any procurement costs and delay damages. The rights and remedies available to City under the Contract are distinct, separate and cumulative remedies, and no one of them, whether or not exercised by a party, shall be deemed to be in exclusion of any other.

If, after termination, it is determined that Contractor was not in default, or that the default was excusable, the rights and obligations of the parties shall be the same as if the termination had been issued for the convenience.

35. Contractor Remedies Upon City Default. City shall be in default if City fails to honor any material term of the Contract, and such failure is not cured within forty-five (45) calendar days after receipt of written notice thereof from Contractor. In the event of City's default, Contractor will be entitled to terminate the Contract and pursue such other remedies available at law or equity as it deems appropriate. **Except as expressly provided elsewhere in the Contract, Contractor will not be entitled to recover any lost profits or consequential damages.** The rights and remedies available to Contractor under the Contract are distinct, separate and cumulative remedies, and no one of them shall be deemed to be in exclusion of any other.

36. Transition Services. At any time prior to the date the Contract expires or terminates for any reason (the "Termination Date"), City may request Contractor to provide reasonable transition assistance services ("Transition Assistance"). Contractor shall provide such Transition Assistance until such time as City notifies Contractor that City no longer requires such Transition Assistance, but in no event for more than 180 days following the Termination Date.

Transition Assistance shall mean any services, functions or responsibilities that are ordinarily or customarily provided to a purchaser to ensure that the services provided to that purchaser by a contractor are fully transitioned in a smooth and efficient manner to a new service provider (either City itself or a third party contractor). Transition Assistance includes the development and implementation of a detailed transition plan.

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

To the extent that Transition Assistance will involve third parties hired by City, those third parties shall cooperate with Contractor in its provision of Transition Assistance and sign any reasonable non-disclosure agreements required by Contractor.

Transition Assistance rendered before the Termination Date shall be provided at no additional cost to City. Transition Assistance rendered after the Termination Date shall be provided at the rates negotiated by the parties prior to the rendering of such service, which rates shall not exceed the standard market rates that Contractor charges to government entities for comparable services; provided however, that if City terminates the Contract because of a breach by Contractor, then (i) the Transition Assistance shall be provided at no cost to City, and (ii) City will be entitled to any other remedies available to it under law. Contractor may withhold Transition Assistance after the Termination Date if City does not provide reasonable assurance that the charges for such Transition Assistance will be paid to Contractor in accordance with the invoicing and payment provisions of the Contract.

37. Force Majeure, Notice of Delay, and No Damages for Delay. Neither party shall be responsible for delays in performance if the delay was beyond that party's control (or the control of its employees, subcontractors or agents). Contractor shall notify City in writing of any such delay or potential delay and describe the cause of the delay either (1) within ten (10) calendar days after the cause that creates or will create the delay first arose, if Contractor could reasonably foresee that a delay could occur as a result, or (2) if delay is not reasonably foreseeable, within five (5) calendar days after the date Contractor first had reason to believe that a delay could result. Based upon such notice, City will give Contractor a reasonable extension of time to perform; provided, however, that City may elect to terminate the Contract in whole or in part if City determines, in its sole judgment, that such a delay will significantly impair the value of the Contract to City. Providing notice in strict accordance with this paragraph is a condition precedent to such remedy. **THE FOREGOING SHALL CONSTITUTE CONTRACTOR'S SOLE REMEDY OR EXCUSE WITH RESPECT TO DELAY.** No claim for damages, other than for an extension of time, shall be asserted against City. Contractor shall not be entitled to an increase in the Contract price or payment of any kind from City for direct, indirect, consequential, impact or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency arising because of delay, disruption, interference, or hindrance from any cause whatsoever.

38. No Waiver. The delay or failure by a party to exercise or enforce any of its rights under the Contract shall not constitute or be deemed a waiver of that party's right thereafter to enforce those rights, nor shall any single or partial exercise of any such right preclude any other or further exercise thereof or the exercise of any other right. Unless otherwise agreed in writing, City's payment for the Services shall not release Contractor of its obligations under the Contract and shall not be deemed a waiver of City's right to insist upon strict performance hereof.

39. Qualification of Contractor Employees, Subcontractors, and Agents. All Contractor employees, subcontractors and agents performing work under the Contract shall be properly trained and qualified. Upon request, Contractor shall furnish a copy of technical certification or other proof of qualification. All employees, subcontractors and agents performing work under the Contract must comply with all reasonable administrative

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

requirements of City and with all controlling laws and regulations relevant to the services they are providing under the Contract. City may conduct, and Contractor shall cooperate in, a security background check or other assessment of any employee, subcontractor or agent furnished by Contractor. City may refuse access to, or require replacement of, any personnel for reasonable cause.

Contractor shall take all actions necessary to ensure that Contractor's employees, subcontractors and agents are not considered employees of City. Such actions include, but are not limited to, ensuring that Contractor's employees, subcontractors and agents receive payment and any legally mandated insurance (e.g., workers' compensation and unemployment compensation) from an employer other than City.

As a condition to providing services to City, Contractor (and any subcontractor) will enroll and participate in the federal E-Verify Program within thirty days of the effective date of the Contract. Proof of enrollment and participation will be made available to City upon request.

40. Security Procedures. Contractor and its employees, subcontractors and agents shall comply fully with all generally applicable security procedures of the United States, the State of Florida and City in performance of the Contract. City agrees that any security procedures imposed by City specifically for the Contract will be reasonable and will not impose any unreasonable costs or hardships.

41. Restrictions on the Use or Disclosure of Buyer's Information. Contractor shall not use, copy or disclose to third parties, except in connection with performing the Services, any information obtained by Contractor or its agents, subcontractors or employees in the course of performing the Services, including, but not limited to, security procedures, business operations information, or commercial proprietary information in the possession of Buyer. At Buyer's request, all information furnished by Buyer will be returned to Buyer upon completion of the Services. Contractor shall not be required to keep confidential any information that has already been made publicly available through no fault of Contractor or that Contractor developed independently without relying on Buyer's information. To ensure confidentiality, Contractor shall take appropriate steps as to its employees, agents, and subcontractors, including the insertion of these restrictions in any subcontract agreement. The warranties of this paragraph shall survive the Contract.

42. Protection of Contractor's Trade Secrets and Other Confidential Information. All documents received by City in connection with this Agreement are subject to Chapter 119, Florida Statutes (the "Florida Public Records Law"). Any specific information that Contractor claims to be a trade secret or otherwise exempt from the Florida Public Records Law must be clearly identified as such by Contractor on all copies furnished to City. City agrees to notify Contractor of any third-party request to view such information, but it is Contractor's obligation to obtain a court order enjoining disclosure. If Contractor fails to obtain a court order enjoining disclosure within five (5) business days of Contractor's receiving notice of the request, City may release the requested information. Such release shall be deemed for purposes of the Contract to be made with Contractor's consent and will not be deemed to be a violation of law, including but not limited to laws concerning trade secrets, copy right or other intellectual property.

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

43. Assignment. Each party binds itself and its respective successors and assigns in all respects to all of the terms, conditions, covenants and provisions of the Contract. Contractor shall not sell, assign or transfer any of its rights (including rights to payment), duties or obligations under the Contract without the prior written consent of City. In the event of any assignment, Contractor shall remain liable for performance of the Contract unless City expressly waives such liability. City may assign the Contract with prior written notice to Contractor of its intent to do so. Nothing herein shall be construed as creating any personal liability on the part of any officer, employee or agent of City.

44. Notice and Approval of Changes in Ownership. Because the award of the Contract may have been predicated upon Contractor's ownership structure, Contractor agrees that any transfer of a substantial interest in Contractor by any of its owners shall require City's prior written approval, which approval shall not be unreasonably withheld or unreasonably delayed. By execution of the Contract, Contractor represents that it has no knowledge of any intent to transfer a substantial interest in Contractor. A substantial interest shall mean at least 25% of the voting shares in Contractor. This section shall not apply to (i) transfers occurring upon the incapacitation or death of an owner; (ii) transfers associated with an initial public offering on the NYSE or NASDAQ markets; or (iii) transfers to a company whose stock is publicly traded on the NYSE or NASDAQ markets.

45. Assignment of Antitrust Claims. Contractor and City recognize that in actual economic practice, overcharges resulting from antitrust violations are in fact usually borne by City. Therefore, Contractor hereby assigns to City any and all claims under the antitrust laws of Florida or the United States for overcharges of goods, materials or services purchased in connection with the Contract.

46. Equal Employment Opportunity. The Equal Opportunity clause in Title 41, Part 60-1.4 of the Code of Federal Regulations (Paragraphs 1 through 7 of President's Executive Order 11246), the provisions of the Equal Opportunity for Individuals with Disabilities Act in 42 U.S.C. Section 12112, the Listing of Employment Openings for Veterans Clause in Title 41, Part 50-260.2 of the Code of Federal Regulations and the Disabled Veterans and Veterans of the Vietnam era Clause in Title 41, Part 60-250.5 of the Code of Federal Regulations, are incorporated herein by reference if and to the extent applicable. If Contractor is exempt from any of the above cited terms, written evidence of such exempt status must be provided to City.

47. Other Non-Discrimination Provisions. As required by Section 126.404, Jacksonville Ordinance Code, Contractor represents that it has adopted and will maintain a policy of non-discrimination against employees or applicants for employment on account of race, religion, sex, color, national origin, age or handicap, in all areas of employment relations, throughout the term of the Contract. Contractor agrees that, on written request, it will permit reasonable access to its records of employment, employment advertisement, application forms and other pertinent data and records, by the Executive Director of the Community Relations Commission, or successor agency or commission, for the purpose of investigation to ascertain compliance with the non-discrimination provisions of the Contract; *provided however*, that Contractor shall not be required to produce, for inspection, records covering periods of time more than one (1) year prior to the effective date of the Contract. Contractor

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

agrees that, if any of the products or Services to be provided pursuant to the Contract are to be provided by a subcontractor, the provisions of this Section shall be incorporated into and become a part of the subcontract.

48. Prompt Payment to Subcontractors and Suppliers. The following is required by Chapter 126, Part 6, Jacksonville Ordinance Code; provided however, if Contractor does not use JSEB subcontractors, as identified below, this Section 3.38 shall not apply:

(a) *Generally*. When Contractor receives payment from City for labor, services or materials furnished by subcontractors and suppliers hired by Contractor, Contractor shall remit payment due (less proper retainage) to those subcontractors and suppliers within fifteen (15) calendar days after Contractor's receipt of payment from City. Nothing herein shall prohibit Contractor from disputing, pursuant to the terms hereof, all or any portion of a payment alleged to be due to its subcontractors and suppliers. In the event of such dispute, Contractor may dispute the disputed portion of any such payment only after Contractor has provided notice to the City and to the subcontractor or supplier whose payment is in dispute, which notice shall: (i) be in writing; (ii) state the amount in dispute; (iii) specifically describe the actions required to cure the dispute; and (iv) be delivered to City and said subcontractor or supplier within ten (10) calendar days after Contractor's receipt of payment from City. Contractor shall pay all undisputed amounts due within the time limits imposed by this Section.

(b) *Jacksonville Small and Emerging Business Enterprise and Minority Business Enterprise Participation*. Notwithstanding Chapter 126, Part 6 of the Jacksonville Ordinance Code, Contractor shall pay all contracts awarded with certified Jacksonville Small and Emerging Business Enterprises ("JSEB"), as defined therein, their pro rata share of their earned portion of the progress payments made by City under the Contract within seven (7) business days after Contractor's receipt of payment from City (less proper retainage). The pro-rata share shall be based on all work completed, materials and equipment furnished, or services performed by the certified JSEB at the time of payment. As a condition precedent to progress and final payments to Contractor, Contractor shall provide to City, with its requisition for payment, documentation that sufficiently demonstrates that Contractor has made proper payments to its certified JSEB's from all prior payments Contractor has received from City. Contractor shall not unreasonably withhold payments to certified JSEB's if such payments have been made to Contractor. If Contractor withholds payment to its certified JSEB's, which payment has been made by City to Contractor, Contractor shall return said payment to City. Contractor shall provide notice to City and to the certified JSEB's whose payment is in dispute, which notice shall: (i) be in writing; (ii) state the amount in dispute; (iii) specifically describe the actions required to cure the dispute; and (iv) be delivered to City and said JSEB's within five (5) calendar days after Contractor's receipt of payment from City. Contractor shall pay all undisputed amounts due within the time limits imposed in this Section. The failure to pay undisputed amounts to the JSEB's within seven (7) business days shall be a breach of the Contract, compensable by one per-cent (1%) of the outstanding invoice being withheld by City, not as a penalty, but as liquidated damages to compensate for the additional contract administration by City.

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

(c) *Third Party Liability.* The Prompt Payment requirements hereunder shall in no way create any contractual relationship or obligation between City and any subcontractor, supplier, JSEB or any third party or create any City liability for Contractor's failure to make timely payments hereunder. However, Contractor's failure to comply with the Prompt Payment requirements shall constitute a material breach of Contractor's contractual obligations to City. As a result of said breach, City, without waiving any other available remedy it may have against Contractor, may: (i) issue joint checks; and (ii) charge Contractor a 0.2% daily late payment charge or the charges specified in said Chapter 126 of the Jacksonville Ordinance Code for JSEB's and in Chapter 218, Florida Statutes, for non-JSEB's, whichever is greater.

49. Conflicts of Interest. Contractor acknowledges that Section 126.112 of the Jacksonville Ordinance Code requires that a public official who has a financial interest in a bid or contract make a disclosure at the time that the bid or contract is submitted or at the time that the public official acquires a financial interest in the bid or contract, including but not limited to the public official's name, public office or position held, bid or proposal number, and the position or relationship of the public official with the bidder or contractor.

50. Contingent Fees Prohibited. Contractor warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for Contractor, to solicit or secure the Contract and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bona- fide employee working solely for Contractor, any fee, commission, percentage, gift or any other consideration, contingent upon or resulting from the award or making of the Contract. For the breach or violation of these provisions, City shall have the right to terminate the Contract without liability and, at its discretion, to deduct from the contract price, or otherwise recover, the full amount of such fee, commission, percentage, gift or consideration.

51. Truth in Negotiation Certificate. The execution of the Contract by Contractor shall be deemed to be a simultaneous execution of a Truth-In-Negotiation Certificate, whereby Contractor states that the wage rates and other factual unit costs supporting the compensation hereunder are accurate, complete and current at the time of contracting. Further Contractor agrees that the compensation hereunder shall be adjusted to exclude any significant sums where City determines the contract price was increased due to inaccurate, incomplete or non-current wage rates and other factual unit costs, provided that any and all such adjustments shall be made within one (1) year following the completion date of the Contract.

52. Compliance with Applicable Laws. Contractor (and any subcontractors) must comply with all applicable federal, state and local laws, rules and regulations as the same exist and as may be amended from time to time, including, but not limited to:

- Section 287.055, Florida Statutes (the Consultants' Competitive Negotiation Act);

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

- Chapter 119, Florida Statutes (the Florida Public Records Law);
- Section 286.011, Florida Statutes (the Florida Sunshine Law);

Form 2 - Certification Regarding Lobbying

1. REQUIRED FEDERAL AFFIRMATIVE STEPS.

The prime supplier, if subcontractors are used, must, at a minimum, take the following six "affirmative steps" to assure that minority firms, women's business enterprises, and labor area surplus firms are used when possible:

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

1. Solicitation Listing. The sub-grantee must place qualified small and minority businesses and women's business enterprises on solicitation lists.
2. Soliciting. The sub-grantee must assure that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources.
3. Breaking-up Requirements. The sub-grantee must divide total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority business, and women's business enterprises. In applying this requirement, it is important to recognize that dividing up a large requirement into smaller parts so as to fall beneath the small acquisition threshold is prohibited, as would the opposite technique of bundling requirements so that it precludes small businesses, minority firms, and women's business enterprises from being a prime supplier. Notwithstanding, dividing a bona fide large requirement into smaller components to facilitate participation by small businesses would be acceptable.
4. Accommodating Delivery Schedules. The sub-grantee must establish delivery schedules, where the requirement permits, which encourage participation by small and minority businesses and Women's Business Enterprises.
5. Using Federal Agencies. Using the services and assistance of the Small Business Administration, and the Minority Business Development Agency of the Department of Commerce.
6. Affirmative Steps for Suppliers. The City of Jacksonville must require the prime supplier, if subcontracts are to be let, to take the five affirmative steps described above.

2. EQUAL OPPORTUNITY CLAUSE. (All Federal assisted construction contracts)

During the performance of this contract, the supplier agrees as follows:

1. The supplier will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The supplier will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The supplier agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.
2. The supplier will, in all solicitations or advertisements for employees placed by or on behalf of the supplier, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex, or national origin.
3. The supplier will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the supplier's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.
4. The supplier will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.
5. The supplier will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.
6. In the event of the supplier's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the supplier may be declared

Docusign Envelope ID: AAC98DFA-FD69-40F7-972D-DDCC82BEB574

7. The supplier will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The supplier will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event a supplier becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the supplier may request the United States to enter into such litigation to protect the interests of the United States."

Nothing herein shall prohibit Supplier from disputing, pursuant to the terms hereof, all or any portion of a payment alleged to be due to its subcontractors and suppliers. In the event of such a dispute, Supplier may withhold the disputed portion of any such payment only after Supplier has provided notice to City and to the subcontractor or supplier whose payment is in dispute, which notice shall: (i) be in writing; (ii) state the amount in dispute; (iii) specifically describe the actions required to cure the dispute; and (iv) be delivered to City and said subcontractor or supplier within ten (10) calendar days after Supplier's receipt of payment from City. Supplier shall pay all undisputed amounts due within the time limits imposed by this section.
