

Sustainability

James Geller

Millennium Specialty Chemicals, Inc. – Jacksonville Site

August 28th

Water Withdrawals

- Our average daily withdrawals from the Floridian aquifer have decreased 40% over the last three years

Water Discharge

- Zero Discharge to our NPDES outfall for over a year (Moncreif Creek)
- 100% of our water was diverted to the First Tee Golf Course for that same period

Raw Materials

- Predominantly our raw materials come from the Paper Industry and the Citrus Industry
 - CST
 - D-Limonene

Renewable Fuels

- In the last 5 years we averaged 3 million gallons a year of Glidfuel, a terpene based fuel.
 - This offsets using natural gas or fuel oil in our boilers
