DESCRIPTION: Initiated work at intersection of 7th Street & Vanburen per ETM/EOR. Crew/Equipment also completed backfill and compaction at the crosswalk on East 7th Street so accurate utility locations and associated conflicts with these unmarked utilities could be identified. Information was provided to EOR (Hanson) for plan revisions. Crew moved to E 7th Street and Van Buren Street intersection to search for potential tie-in conflicts (due to having to move and work out of sequence)

SUBTOTAL	$	4,313.91
0.67% Bond NA	$	-
GRAND TOTAL	$	4,313.91

Sheet No. 02-02

Contract Nos. COJ 6533-56/JEA 164267
JBCCI Project Nos. 1706/1709
Proposed Change Order No.5 – East 7th Street Duct Bank Locate

Dear Mr. Donchez:

As requested during our project progress meeting on May 3, 2018, J.B. Coxwell Contracting, Inc. (JBCCI) has prepared this Proposed Change Order (PCO) No.5 to uncover and locate a concrete and steel-reinforced duct bank which extends along East 7th Street.

JBCCI encountered two sets of electrical conduits which are located along the northern portion of the East 7th Street right-of-way and extend from Station 26+25 to Station 35+00 (approximately 875 feet). One set of conduits (3 to 4 conduits) appear to have been direct bury and were not encased in a duct bank. It is unclear whether these conduits extend the entire 875 feet. The second set of conduits are believed to extend the entire length from Florida Avenue to pedestrian crosswalk over East 7th Street. This set of conduits is fully encased in concrete which has been re-enforced with 1-inch diameter steel rebar. These duct banks are located within the footprint of the future recharge gallery and may also conflict with other proposed utilities to be installed through this area. The smaller set of conduits does not appear to be encased in concrete and it appears that it can be removed as we work through those areas. The removal of the concrete-encased duct bank will require significantly more effort as it will involve specialized equipment, additional handling and disposal. This PCO includes the scope and estimated cost to uncover the encased duct bank and survey the location such that it can be compared to proposed utility locations to evaluate what sections would need to be demolished. If sections can be left in place, it will reduce the cost of removal. If we know the locations where the duct bank must be removed, we can remove all these sections in one mobilization, which further saves removal costs.

JBCCI proposed to uncover the 875 linear feet (LF) section of duct bank every 50 feet or approximately 18 locations. The soil will be excavated at each location such that the top and top edges are uncovered. We will mark each side with a stake and position an open pipe directly on top of the duct bank in a vertical manner and backfill the excavation. Our survey team will locate each stake and record to top of duct bank elevation through the open pipes installed earlier. This data will be tabulated and provided to the EOR such that the duct bank location can be plotted on the project construction

plans to identify areas where conflicts will occur. Once this information is known, JBCCI can provide a cost estimate for the removal of those sections. The estimated cost to locate the concrete encased duct bank is as follows:

Item	Estimated Cost
Pipe Crew Labor – One 5-Man crew day for 10 hours	$ 1,400
Equipment – Truck, Excavator and Loader for one day	$ 1,200
Survey Crew Labor/Equipment – 5 hours @ $180/hour	$ 900
Total	**$ 3,500**

JBCCI can initiate this scope of work within one week of receiving approval from the City of Jacksonville. We estimate that the work can be completed in two days. Our work product will be tabulated data from the surveyor, which will be provided to the Engineer of Record (Hanson) for further processing. If you have any questions or want to further discuss this proposal and cost estimate, please do not hesitate to contact me or Chris Blank at (904) 786-1120 or via email at garyy@jbcoxwell.com.

JBCCI Project Nos. 1706/1709
Proposed Change Order No.3 – Addition of Temporary Asphalt Paving at East 1st Street and A. Phillip Randolph

Dear Mr. Donchez:

As per the City of Jacksonville's (COJ's) request associated with our Request For Information (RFI) No.21, J.B. Coxwell Contracting, Inc. (JBCCI) has prepared this Proposed Change Order (PCO No.3) to install temporary asphalt paving at the intersection of A. Phillip Randolph and East 1st Street in the areas where the existing pavement has been removed. An area measuring approximately 480 square yards (SYs) of existing asphalt was saw-cut and removed to tie in the water main through that area. The proposed temporary asphalt in that area would be a minimum of 1 inch thick, plus a crown would be installed as shown in the COJ Standard Paving Details, Plate P-409. The road base and asphalt would be installed as a typical Case-X type repair and would be removed/milled once all project-related utility work within that area is completed. Upon completion, the project specifies that this intersection will receive new pavement the entire width. The cost to complete this scope of work is presented below:

Site Preparation (included in original scope of work for this area)	$ No Charge
Temporary Asphalt Repair (Case-X type) – 480 SYs at $14.30/SY	$ 6,864
Temporary Asphalt Repair Removal (included in original scope of work)	$ No Charge
Total for 480 SYs of Temporary Asphalt	**$ 6,864**

If you have any questions or want to further discuss the PCO, please do not hesitate to contact me or Chris Blank at (904) 786-1120 or via email at garyy@jbcoxwell.com.

Respectfully,
J. B. COXWELL CONTRACTING, INC.
