ONLINE CRIME MAPPING PROGRAM REFERENCE GUIDE

The goal of the new online crime mapping program, released by the Jacksonville Sheriff's Office is to inform the citizens of Jacksonville about criminal incidents throughout the community. This document serves as a reference guide to navigating the application. Keep in mind that the data in the application has been filtered to exclude sex crimes, child abuse, and other crime information protected by statute or reported by other agencies.

A Collaborative Project Between the Public Information Unit, Community Affairs & Special Events Division, and the Crime Analysis Unit
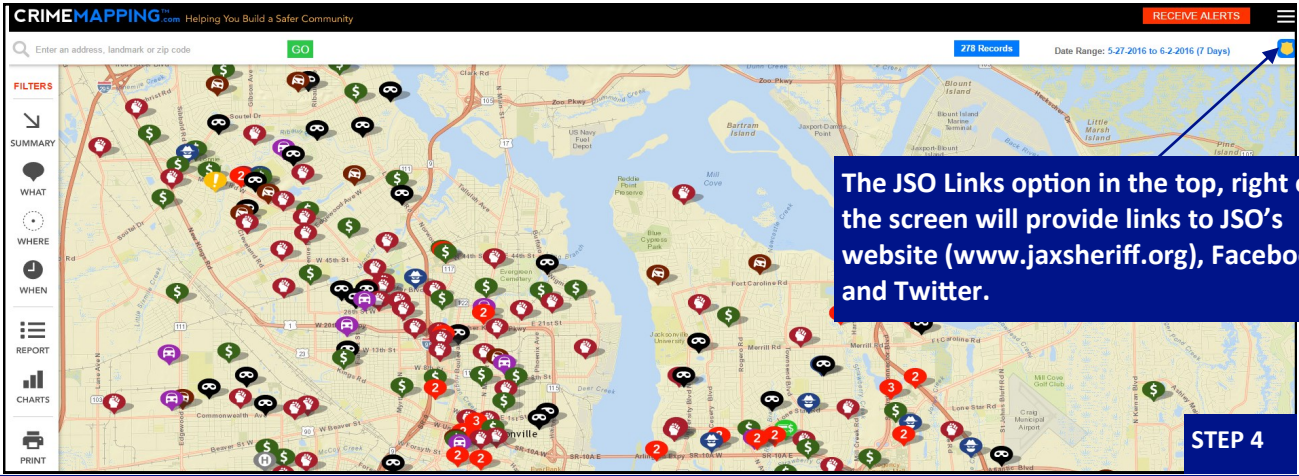

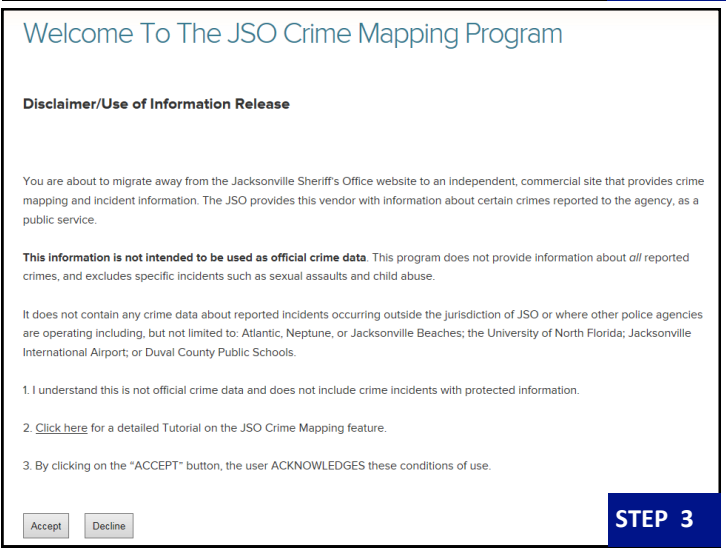

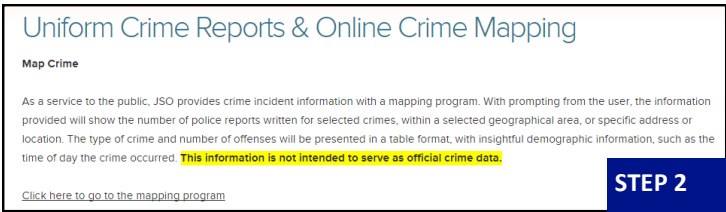

ACCESSING THE CRIME MAPPING SITE:

STEP #1: To access the site you can go directly to www.jaxsheriff.org and select the top left button with the three horizontal lines. The button will then "flyout" providing access to navigate to different areas of the site. Then select "Crime Statistics/Crime Mapping" from the navigation menu (*see image below*).

STEP #2: You will be directed to the UCR & Online Crime Mapping page (*see image below*). Click the link for Crime Mapping

STEP #3: A disclaimer page will appear and you must accept the terms to proceed to the site (*see image below*).
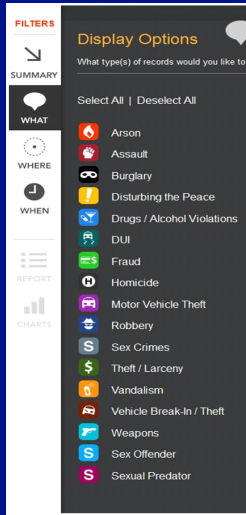

STEP #4: The application will open and look something like the graphic below (*see image below*).

STEP 1

Uniform Crime Reports & Online Crime Mapping

Map Crime

As a service to the public, JSO provides crime incident information with a mapping program. With prompting from the user, the information provided will show the number of police reports written for selected crimes, within a selected geographical area, or specific address or location. The type of crime and number of offenses will be presented in a table format, with insightful demographic information, such as the time of day the crime occurred. This information is not intended to serve as official crime data.

STEP 2

Welcome To The JSO Crime Mapping Program

Disclaimer/Use of Information Release

You are about to migrate away from the Jacksonville Sheriff's Office website to an independent, commercial site that provides crime mapping and incident information. The JSO provides this vendor with information about certain crimes reported to the agency, as a public service.

This information is not intended to be used as official crime data. This program does not provide information about *all* reported crimes, and excludes specific incidents such as sexual assaults and child abuse.

It does not contain any crime data about reported incidents occurring outside the jurisdiction of JSO or where other police agencies are operating including, but not limited to: Atlantic, Neptune, or Jacksonville Beaches; the University of North Florida; Jacksonville International Airport; or Duval County Public Schools.

1. I understand this is not official crime data and does not include crime incidents with protected information.

2. Click here for a detailed Tutorial on the JSO Crime Mapping feature.

3. By clicking on the "ACCEPT" button, the user ACKNOWLEDGES these conditions of use.

[Accept] [Decline]

STEP 3

The JSO Links option in the top, right of the screen will provide links to JSO's website (www.jaxsheriff.org), Facebook and Twitter.
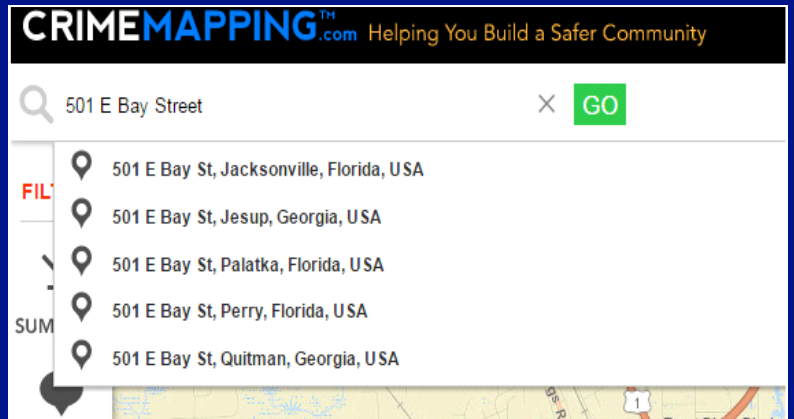

STEP 4

Rev. 6/2016

1. Select Crime Type

Users can display all or specific crime types on the map. Select the "What" button from the left-side toolbar. The pop-out menu will provide the seventeen (17) incident categories to choose from.
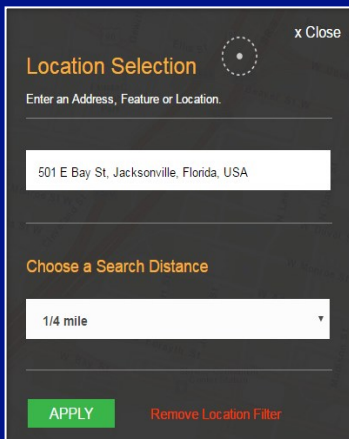

2. Select Location

Users may map to a specific address or location of interest. Use the search box above the map and select "Go".
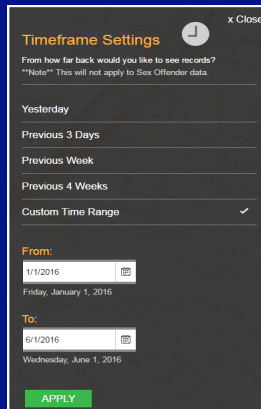

3. Select Location

Users may search for crimes (up to 2 miles) around a specific address or location of interest. Select the "Where" button from the left-side.
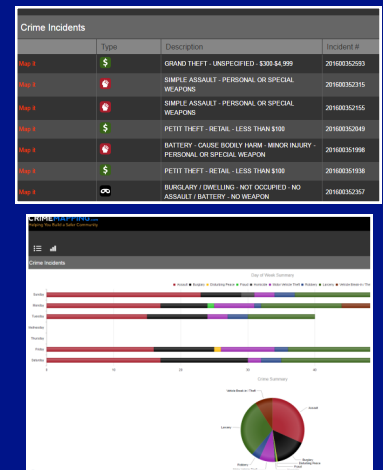

4. Select Date

Users can adjust dates by selecting the "When" button from the left-side toolbar. Select a preset date parameter or a custom date range (up to 180 days from the current date).
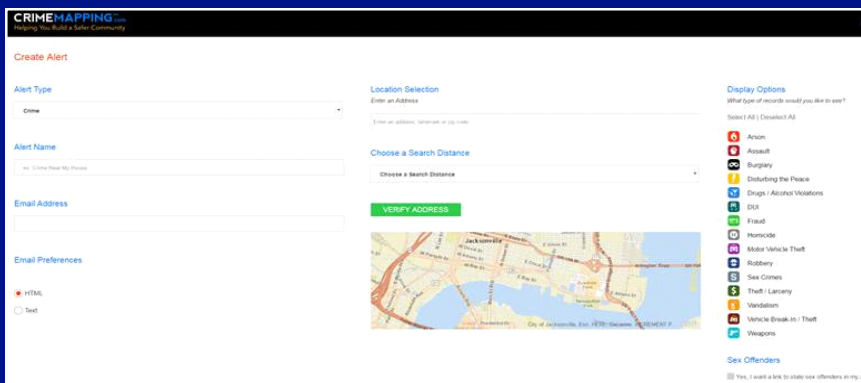

5. Reports/Charts

Users can produce reports and visualize graphs for their filtered crime selection by selecting "Reports" or "Charts" from the left-side toolbar.

6. Crime Alerts

Users can select "Receive Alerts" to create automated email alerts for crime near a specific address or location of interest. Note: The larger the radius, the greater the email volume.

7. Summary
