

Public Works Engineering and Construction Management -
Professional Design Services Forecast (updated 03/29/2026)

| <u>Quarter</u> | <u>Project Name</u> | <u>Description</u> |
|----------------|---------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Q1 2026 | Architectural and Engineering Services for Miscellaneous Park Improvements— Annual Contract North | Professional Engineering design, permitting, and all other professional services needed for bidding and construction of Miscellaneous Park Improvements— Annual Contract North. Typical improvements include restrooms, playscapes, sports fields, parking lots, landscaping, trails, and lighting. This annual contract will support multiple locations of new and existing parks needing improvements. |
| Q1 2026 | Architectural and Engineering Services for Miscellaneous Park Improvements— Annual Contract West | Professional Engineering design, permitting, and all other professional services needed for bidding and construction of Miscellaneous Park Improvements— Annual Contract West. Typical improvements include restrooms, playscapes, sports fields, parking lots, landscaping, trails, and lighting. This annual contract will support multiple locations of new and existing parks needing improvements. |
| Q1 2026 | As-Needed Professional Design Services for Public Works Projects | Professional Engineering design, permitting, and all other professional services needed for bidding and construction of Public Works projects. Services will be provided on an as-needed or “on-call” basis and may include engineering, architecture, surveying and mapping, right of way acquisition, program management, landscape architecture, land planning, and utility design. |
| Q1 2026 | Professional Design Services for Starratt Road and Yellow Bluff Road Intersection Improvement | Professional engineering design, permitting, and all other professional services needed for bidding and construction of Starratt Road and Yellow Bluff Road Intersection Improvement. The project consists of design of roadway improvements including milling and resurfacing, signing, lighting, signalization, and drainage. |

Public Works Engineering and Construction Management -
Professional Design Services Forecast (updated 03/29/2026)

| <u>Quarter</u> | <u>Project Name</u> | <u>Description</u> |
|----------------|--------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Q1 2026 | CEI Services for Angel Lakes Drainage Improvements | Professional Construction Engineering and Inspection services which are required for constructability reviews, contract administration, inspection, and materials sampling and testing for the construction of the Angel Lakes Drainage Improvements project. The project extends approximately 2 miles along V.C. Johnson Road and Angel Lake Drive West from Dunn Avenue to the end of Angel Lake Drive West and includes ditch filling, culvert replacement, swales with inlets, and new sidewalks. |
| Q1 2026 | CEI Services for Chaffee Road Improvements & Chaffee Road South Widening | Professional Construction Engineering and Inspection services required for constructability reviews, contract administration, inspection, and testing. The Chaffee Road Improvements extend from Beaver Street to Old Plank Road (1.25 miles) and include resurfacing, paved shoulders, sidewalks, signalization, and a multi-use path. The South Widening extends from Normandy Boulevard to I 10 (2.7 miles) and widens the corridor from two lanes to a divided four lane section with sidewalks and a multi-use path. |
| Q1 2026 | CEI Services for First Responder Hurricane Safe Room | Professional Construction Engineering and Inspection services required for contract administration, inspection, and testing for the construction of the First Responder Hurricane Safe Room. The project includes an approximately 25,000 square foot emergency structure built to FEMA P-361 criteria, along with utilities, site work, and a stormwater pond. |
| Q1 2026 | CEI Services for Hartley Road Widening | Professional Construction Engineering and Inspection services which are required for constructability reviews, contract administration, inspection, and materials sampling and testing for the construction of the Hartley Road Widening project. The improvements extend along Hartley Road from Old St. Augustine Road to SR 13 and will include the addition of travel lanes, roadway lighting, bicycle and pedestrian improvements, and associated stormwater and drainage upgrades. |
