2	COMMISSIONER EPSTEIN: Yeah, I understand.	2	on the model.
3	MR. WATERS: And that's what you've got in	3	COMMISSIONER EPSTEIN: I guess I'm just
4	that picture. That's a vinyl replacement	4	I don't see that those are the same thickness.
5	window in that picture.	5	It looks like that that's, like, an inch and a
6	COMMISSIONER EPSTEIN: Yes.	6	half. And what is on that picture there looks
7	These look entirely different to me	7	like it's maybe, like, a half of an inch.
8	because this again, this is like a masonry	8	It looks to me like it's the same size as
9	detail that would have a brick mold around it,	9	the double-hung actual sash frame.
10	and it's a lot thicker. That makes sense to	10	MR. WATERS: Sure.
11	me.	11	COMMISSIONER EPSTEIN: And looking at it
12	This (indicating), I can really only see	12	here (indicating), to me, it looks like it's
13	the window sashes. I can't see that really	13	about three times the size of that.
14	thick trim that you have there.	14	So that's my question.
15	So that's my question.	15	MR. WATERS: (Off microphone.)
16	MR. WATERS: (Off microphone.)	16	Sure. Well, the thing with vinyl
17	I'm going to zoom in with my phone on this	17	windows, and (inaudible)
18	picture so you can see this.	18	THE CHAIRMAN: Sir, can you speak into the
19	Okay. So here is zoomed in, so you can	19	microphone, please?
20	see it's the red. And I'm going to zoom in	20	Thank you.
21	right here (indicating). Try to try to look	21	MR. WATERS: So the thing about with
22	a little closer. You're going to see	22	vinyl windows is that they do differentiate
23	You're getting you're seeing this part	23	from the old aluminum windows or the old wood
24	(indicating), you're seeing this rail here, and	24	vinyl needs to be thicker to have strength. So
25	then this part in here is actually bumped up	25	there's a set standard for all windows across

COMMISSIONER EPSTEIN: Yeah, I think through the Chair, I think this is a little bit more of what we've been asking for, is the actual dimensions of this. I know that Lauren had sent us the schematic of all the different parts and pieces, but nowhere did it say, when it was assembled, what the actual dimensions of everything were. And I tried to do some math in CAD and everything with it, and I was like,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	system let me see what you guys call it so I make sure that I'm using the right terminology. 9	Thank you.	9	we slip the whole new system in.	
10	MR. WATERS: I'm going to not forget one	10	So what you're seeing on this picture is	
11	of these days.	11	identical to what it looks like with that. So	
12	Yeah, 1.9 inches is the bottom of our	12	that doesn't change it at all. There's no	
13	rail, of our bottom rail, whereas Pella's was	13	and you're calling it a brick mold, but that's	
14	1.75. So our bottom rail is actually about an	14	actually the original framing of the window, so	
15	eighth inch thicker than Pella's.	15	it does look identical.	
16	COMMISSIONER EPSTEIN: So your frame and	16	COMMISSIONER EPSTEIN: Okay.

6	Lauren, I just sent it to you. I don't	6	COMMISSIONER MORGAN: Through the Chair to	
7	know if you received it.	7	Commissioner Epstein, I'm kind of leaning on	
8	COMMISSIONER EPSTEIN: Yeah, and I	8	you for the dimensions and making sure that	
9	understand why it looks so different with	9	everything is correct and the mounting and	
10	when it's installed with brick, because with	10	installation.	
11	brick you don't have trim, you just install it	11	I think my heartburn is still with the	
12	in the rough opening, and then that's why you	12	vinyl. This is not about you. This about how

14	it sort of acts as a brick mold in that	14	earlier, the past two meetings, I've been kind

16	that requires trim around it, I	16	I didn't want to send you to go look into this	
17	I would be inclined for us, if we approve	17	unless we were okay with opening it up for

7	She walked that whole block, and she sent me pictures of every single house that has	6	MR. WELLS: Thank you.	
8	vinyl replacements, and homes that had been	8	So to the Chair, there's a number of	
9	remodeled completely went back with vinyl	9	options we can elect. This is all based on the	
10	windows. They just because they ripped out	10	COA matrix. And so window replacement if	
11	the whole entire system and then just went back	11	we've deemed that the windows were missing	
12	with brand-new nailing fins, wasn't even a	12		
13	slip-in. So, basically, it was this exact	13	metal or nonoriginal, we can replace them with any type of window material as long as it	
14	window with nailing fins, they put the new wood	14	matches the compatible it's a compatible	
15	siding. There was a couple of houses down that	15	design placement and arrangement.	
16 17	<pre>did that, so worse on the whole block. It was it was predominantly vinyl, so</pre>	16 17	The same thing goes for noncontributing structures. And a third one would be new	
18	MS. PRATER: And, Commissioner, I would	18	construction. So when you do see these new	
19	just ask, along the lines of "beg," that I not	19	construction COAs that come before you, usually	
20	be the case to have that ruling be decided on	20	they're requesting a vinyl product.	
21	because when I applied, vinyl was, in fact, an	21	So those are the only three types of	
22	option from what I was otherwise, I wouldn't	22	exceptions that we have for other materials	
23	have been able to apply for vinyl windows.	23	besides wood.	
24	So I would ask that if that is something,	23	COMMISSIONER EPSTEIN: So through the

5	MR. WELLS: Through the Chair to	5	in some of the photos, you know, I get the	
6	Commissioner Epstein, so when it's a holistic	6	impression there's too much frame exposed, if	
7	window replacement, it would be we it	7	that makes sense, you know. And Commissioner	
8	doesn't give you a wider option for materials	8	Epstein had mentioned something about making	
9	unless the windows have been deemed missing,	9	sure that since this is a wood frame house,	
10	nonoriginal, or the structure itself is	10	it looks like there's kind of stucco on the

13	then we usually limit it to a wood or wood	13	my primary concern.	
14	blend product.	14	MR. WATERS: So those are great concerns.	
15	MS. PRATER: And just to be sure, I think	15	And when I bring samples into people's houses a	
16	my windows were deemed I think there was an	16	lot of times we have a slider that we use as	
17	assessment as to whether mine were all	17	well that has an actual impact rating frame	
18	historic, and I believe in the valuation I	18	the first response I get out of people is,	
19	think most of them were not historic or a good	19	"Whoa, that's a lot of vinyl," because it's so	
20	amount of them were not historic.	20	compact. You're seeing just all this vinyl	
21	MR. WATERS: Two out of 25 windows were	21	right next to itself. But when you put it in	
22	originals.	22	an opening that's 35 inches wide by 60 inches	
23	COMMISSIONER EPSTEIN: Through the Chair	23	tall, 72 inches tall, which is what her house

1	survey that was done, that the windows were	1	here, you're like, bam, looking at a lot of	
2	deemed nonoriginal, nonhistoric?	2	white vinyl right there. But when it gets	
3	MR. WELLS: Through the Chair, they were	3	slipped in the hole and it blends up with the	
4	deemed nonoriginal. However, we did find that	4	4-inch trim panel on the outside and it's a	
5	they may have contributed or achieved	5	large piece of glass, it just blends in	
6	historic significance because they've been on	6	beautifully. So it's	
7	the structure for more than at least 50 years	7	I do completely relate and understand with	
8	or so. We believe that the windows were	8	your with your thoughts on that because I	
9	replaced in around the '60s or '70s, so that's	9	get that question a lot. And normally I go	
10	why we forwarded it to you as well, along with	10	through a portfolio and say, "This is what your

13	Commissioner Epstein, you wanted to know some	13	So just to give you a little alleviation

15	So from what I recall from last month's	15	frame and show you, you know, exactly the	
16	meeting and discussion, the whole vinyl window	16	differences. And it's hard to see off of the	
17	aspect not withstanding, I think there was some	17	pictures, but, again, this was designed

1	little thicker than	1	we're going to tilt this in here.	
2	COMMISSIONER EPSTEIN: Yes.	2	So now, after tilting it in, you see just	
3	MR. WATERS: Right.	3	the frame of the window itself. So if you can	
4	COMMISSIONER EPSTEIN: I understand, and	4	envision, now that's what with a	
5	that's that's one of the things you run into	5	single-hung, that's what we would do, is we

17	how the connection of it comes together because	17	MR. WATERS: In the frame itself, correct.	
18	when you have wood, it comes together. You can	18	COMMISSIONER EPSTEIN: And you do not see

25	MR. WATERS: Not at Window World, ma'am.	25	The I was an installer for ten years, so I

1	staff, I want to thank you for the explanation	1	Epstein's concerns. If you know, maybe I	
2	on why we're discussing the vinyl windows,	2	can try and figure out how to work with that as	
3	which sort of changes things for where I stand.	3	a because right now time is of the essence.	
4	Last month, I was really excited about	4	So if that would be accepted

8	know, if we're going to compromise the	8	district. I just read and I could be wrong,	
9	materiality, then we can't compromise the rest.	9	but I reread my report, and I think it said	
10	The only other thing that I wanted to	10	that most of my windows were not contributing;	
11	state and I'm not sure if you guys picked up	11	they were not original and noncontributing. I	
12	on this was the screen in that that needs to	12	think it was like 12 to 15 of them, which I

While the primary structure is clad in mostly vinyl and or aluminum siding, according to the property appraiser, the design guidelines and Ordinance Code criteria recommend that materials be replaced to match the replaced material in composition, design, color, texture, and other visual qualities. The installation of vinyl siding would introduce a new material to this structure that would not imitate the existing material. Furthermore, the presence of vinyl/aluminum siding on the primary structure does not justify the replacement of wood siding on the accessory structure. This is iterated in the historic district design guidelines which encourages historic material to be retained and repaired when possible and allows for replacement with compatible materials and designs when the historic fabric is beyond repair. The proposed work would change the character of the subject building and would introduce a new material to the structure. The applicant proposes multiple alterations which are inconsistent with Code criteria/design guidelines, and they are as follows: The wholesale replacement of windows. A majority of the windows, totaling 13 on the structure, are historic wood windows, while some, totaling two, particularly in the rear, are nonhistoric and/or have been replaced with noncompliant vinyl windows. Staff identified that most of the historic windows appear to be within reasonable repair. Furthermore, the replacement product, vinyl, is not a recommended replacement material for historic wood windows that are beyond repair. The covering of historic siding. The historic lap siding which has been exposed appears to be largely intact. There are minor areas where siding is missing, especially in the front and rear elevations. However, staff recommends repair and scattered replacement with matching wood siding rather than covering of the siding with cementitious lap boards. Post Office Box 2575, Jeckschowlik.
